Conferences 05 and 06 from Phase A.

CONF. 05 AND 06

THE DIMENSIONS AND WHERE THEY ARE ABOUT US

WHAT IS A DIMENSION?

A dimension is a Level of Consciousness. There are as many dimensions as there are levels of consciousness.

In each one of the unfoldings the number of laws and the materiality increase.

SEVEN BASIC DIMENSIONS ARE KNOWN IN NATURE:

First Dimension: Length or distance between two points. The Tritocosmos or world of each one of the Atoms. World of the mono-brained and the bi-brained without spinal column. All distances. Linear measures: meter, kilometer, vara, yard, cubit, etc., etc.

Second Dimension: the Surface or displacement of a line in space. All surfaces or measures of surface: square meter, square foot, square vara, square kilometer, Hectare, fanegada, etc., etc.

They are all the surfaces of things or volumes. And they are given by two dimensions: length by width or by height. Their measures are given thus: m2, km2, hm2, etc.

In this dimension we find our Personality and all our superficiality, the appearances of volumes, physical forms.

In this dimension we find all the bi-brained with spinal column and they see the world as superimposed planes. Because they lack the third one they cannot yet self-realize.

This is the world of the 96 laws. And it is called the Limbo or Hall of Hell.

Third Dimension or of Volume: all bodies or things with organic or inorganic physical presence, with three dimensions: length, width and height. Here we find our Physical Body, and all measures are cubic: m3, cm3, dm3, hm3, etc., etc. As we can appreciate, in this dimension the two previous ones are contained.

Here dwell all the three-brained bipeds or rational animals, mistakenly called men, with their three brains. But who, because they have the three brains, can self-realize, humanizing themselves and de-animalizing themselves, in some of their 108 existences as humans.

This Dimension is managed by 48 laws, and we find them in each one of the cells, represented in the 48 chromosomes.

The importance of the physical or material body lies in that it is a condenser of Sexual Creative Energy, and it can transmute it by uniting with another Earth of opposite symbol. Male with female.

Fourth Dimension or Time: it is the duration of our physical body or the duration of any volume. Here we find our Vital Body, also subject to the 48 laws of the physical world. It is the upper part of our matter. (It is seen tetra-dimensionally).

This body represents our Waters, which are 90% of our physical body. The time we refer to is the one that lies between birth and death.

In these Waters we find all the metallic atoms of our seminal system, contained in the aureal field. And these are the ones we need to regenerate and liberate.

Fifth Dimension or Eternity: when defining Eternity we also find time, in a continuous form, without beginning or end. We see, thus, how the previous dimension is contained in this one. That is why we find here the past, the present and the future in a continuous form. We see that everything that has a past will have a future and this prevents living the present from instant to instant.

In this dimension we find two worlds: the Astral World and the Mental World, with their corresponding bodies, which manage different functions and have their own characteristics:

- The Astral Body manages 24 laws, it is of molecular nature, and it is the Fire or desire, it manages our emotional world. It is controlled by the Salamanders of Fire.
- The Mental Body manages 12 laws, it is of atomic nature and corresponds to Air or wisdom, and it originates our intellect. The way of thinking of each one of our atoms. It is controlled by the Sylphs and Sylphids of Air.

SIXTH DIMENSION: Reality or Truth, here we find what is, has been and will be, the planets of the Christ, the electromagnetic worlds.

We also find two different levels, which are:

- The Causal World or of the Conscious Will, where we find the Body of the Will, governed by six (6) laws, with electric nature, formed by all the electrons of our atoms. It represents our Verb or Sexual Creative Energy and all creations. It is the human soul.
- The Buddhic World or of the Consciousness, where we find the Buddhic Body, governed by six (6) laws, with magnetic nature, formed by all the protons of the atoms (the reason for being of the Being). This body is standing, it did not fall. It is the Divine Soul.

SEVENTH DIMENSION OR GREAT REALITY: here is the world of Light or Atmic world, we meet our Innermost, subject to three (3) laws. It is of photonic nature, the lowest that our Being can reach, since it comes from the world of the Spirit. It is the Christic principle in each one of us. It is our particular Warrior. The Atmic Body did not fall either, it is standing in each one of us.

As we can see, as we go up through the dimensions they are lighter. The natures: cellular, etheric, molecular, atomic, electronic, protonic and photonic.

WHERE THEY ARE IN US

The dimensions in ascending form and the seat of the Dimensions in the Centers of the Human Machine.

Let us study this carefully:

Each Dimension is a level of Consciousness. As we recover the Waters, the level of that Consciousness rises through the spinal cord, vertebra by vertebra and body by body.

Each one of the bodies manages a different dimension. Without having created a given body, it is not possible to manage a given dimension.

The raw material for the creation of any of the bodies is the Sexual Creative Energy. This energy is contaminated by the different egos that manifest in us day by day. Therefore, the energy of each day must be decontaminated by working daily.

The bodies are created in the sexual practice (Birth). We work during the day balancing centers with self-observation, preventing the egos from exhausting the energy, so as to be able to have Sexual Creative Energy for the sexual transmutation. At night we copulate to fix the saved energy.

If we understand that each body has its own Waters or Mercury, and that each one must go through its own process, we will understand that the ascent in the levels of Being is slow and progressive.

The conquest of the dimensions allows us to govern them with a smaller number of laws each time. This conquest is made in the Abyss by working our own sexual energy, extracting the light or wisdom from the darkness.

With the work in the Three Factors the whole conquest of the Dimensions is carried out:

- Death allows us to liberate the Consciousness and purify the Sexual Creative Energy.
- Birth in sex allows us the creation of the Existential Bodies of the Being.

- Sacrifice for Humanity allows the de-egoization and the awakening of Love, which is the only law of the Absolute.

CONCLUSIONS:

- It is not possible to ascend into the Higher Dimensions without eliminating the heavy and grotesque part of our personality.
- It is not possible to have real representation in a Dimension without having created the corresponding Body.
- We came to planet earth to self-realize and achieve full Consciousness. This is only possible by descending into the Infradimensions, where 97% of our Essence or Consciousness is trapped.
- Without working on ourselves it is not possible to create anything.
- It is also necessary to know the methods to go on verifying those dimensions, while we make the different creations:
  - To go from the third dimension to the fourth the Jinn states are used.
  - To go from the third dimension to the fifth the Astral Projections are used.
  - To go from the third dimension to the sixth and seventh Meditation is used.

The practice of these methods is necessary in order to be able to verify and know these dimensions directly.

End of Conferences 05 and 06

Dimension	World	Nature	Body	Center	Laws	Method to know it
7th Great Reality	Atmic	Photonic	Atmic	Higher Intellectual	3	Meditation
6th Reality or Truth (Electromagnetic Worlds)	Buddhic	Magnetic	Buddhic	Higher Emotional	6	
	Causal	Electric	Causal or of the Will	Motor	6	
5th Eternity (Time without beginning or end)	Mental	Atomic	Mental	Lower Intellectual	12	Astral projection
	Astral	Molecular	Astral	Lower Emotional	24	
4th Time (The duration of volume)	Etheric	Etheric	Vital	Instinctive	48 laws for both worlds.	Jinn State
3rd Volume	Physical	Cellular	Physical	Sexual		
2nd Surface	Limbo or Hall of hell. Of the Personality	Lower molecular	Lunar astral	Instinctive	96	Astral projection
1st Length	Tritocosmos or atomic Hells	Lower atomic	Lunar	Sexual glands	192 to 24,576 laws	Astral projection
