*Conference 9 from Phase A.*

CONF. 09

# THE INFRADIMENSIONS

The purpose of this topic is that we know that just as it happens on planet Earth, so it happens in our Inner World. In the lower abdomen we find the seven doors that lead to our internal Infradimensions or atomic Hells.

By the Law of Correspondences, we find for the psychological work the Nine Dantesque Circles in our inner world, just as on planet Earth.

All human beings have two moons, the visible moon and the hidden moon. The visible moon is related to our visible defects and to our own Infradimensions. Our invisible moon is related to the Cause Egos and to the Infradimensions of planet Earth.

We have already said that the psychological defects have two ways of coming to an end: voluntarily or involuntarily. When a Being decides to end them voluntarily, it first has to start a psychological war in daily life, working internally on all the psychological aggregates that surface from its inner world.

These egos work by taking possession of the Centers of the human machine, of the sexual apparatus and of the sexual glands.

As we already know, 97% of our Sexual Creative Energy is trapped in the various psychological elements. We have to descend into our Infradimensions to rescue this energy in order to be able to make the different creations.

Let us look at the Infradimensions and the main defects found in each one:

- First Infradimension – Sphere of the Moon: Related to all the lazy ones who have not been baptized. It is showing us that the first work we must carry out is against our own laziness, since it does not let us begin the sexual work nor the work on ourselves.

The sphere of the Moon is related to the planet Moon and to the Sexual Center. In this center we find the atom of the Secret Enemy (the Antichrist), which prevents the execution of every work.

• Second Infradimension – Sphere of Mercury: Related to our Waters and to Instinct. Here are found all the fornicators of our inner world, who finish copulating and are thinking about the next orgasm or fornication. In this circle nothing else is done but spilling the seed.

That is why it is necessary to understand the value of the Ens Seminis for the creation of the Bodies, to learn to value our own energy, to understand the damage that the loss of it caused and to eliminate the fornicating ego in order to be able to do the work of the Great Work.

- Third Infradimension – Sphere of Venus:
  Related to all our pleasures or desires. Here we must understand that desire is the source of all force, that whoever denies himself desire becomes master of the force, that whoever surrenders to desire becomes its slave.

In this circle we find Desire, who acts as Psychological Trainer, the Lucifer, tempting us and testing us. If we defeat him we become masters of fire and light. If we do not defeat him we become his slaves and we will never be able to stop being what we are.

We must study all the pleasures: drinking, eating, gambling, fornicating, committing adultery, sleeping, resting, partying, watching television, working, suffering, etc., etc., because in them our fire (the capacity to love) is trapped.

This sphere is related to the Lower Emotional Center.

• Fourth Infradimension – Sphere of the Sun: The Sun is related to balance, and balance to the Law of the Scale. In this region of our Microcosm we find two kinds of defects that always prevent reaching balance and becoming a self-egocratic system.

We must study all our excesses and deficiencies, originated and expressed in squandering egos and miserly egos. The former invest our inner and outer wealth badly, they squander it. The latter keep it, retain it, and prevent us from doing what has to be done, until the thieving egos steal it.

These defects turn us into beggars, since they do not let the construction of the Existential Bodies take place. This sphere is related to the Lower Intellectual Center.

- Fifth Infradimension – Sphere of Mars: Related to the Motor Center, which manages our works and words. Here we find Force, the good or bad use of it, the defect of Anger.

Therefore, the egos of violence with words and works appear, the insulters, aggressors, fighters, who surface in daily life and exhaust our Sexual Creative Energy in unnecessary reactions during the interrelation with other beings.

We must change the way of reacting to any situation that presents itself to us, it is necessary to observe our impatience and everything it leads us to. Here are the ironic, furious people, the arrogant, haughty, proud, and all the monstrous creations of the ego of Anger.

• Sixth Infradimension – Sphere of Jupiter: Jupiter is the giver of the solar system. Contrary to this, in this circle we find all our tyrant egos, the dictator egos, the hoarding egos, the egos that take possession of things, of lands, the selfish egos that retain money to cause scarcity and economic recession, etc.

All the parents who force their children to eat something they do not like, to study, the parents who keep for themselves the money of the family.

The egos that do not let others give the opinion they think or act with free will, those who want people to do what they want. All those who attack Love and the Divine, the blasphemers, the skeptics, the materialists, the atheists. This region is related to the Higher Emotional Center.

- Seventh Infradimension – Sphere of Saturn: Related to the Higher Intellectual Center. It is in charge of the management of nature.

Here we find all the crimes against the Holy Spirit, against Nature and the violent against Art: The fornicating egos, masturbating egos, homosexual egos, egos of lesbianism, adulterous egos, egos of lasciviousness, egos of pornography, egos of prostitution, egos that practice sex with animals, egos that practice anal sex, egos that practice oral sex, self-homosexual egos, sexual abuser egos, egos that practice sex several times a day, egos that copulate while the woman is pregnant, egos that copulate while the woman is menstruating, egos that force themselves to practice sex, egos that force their wife to practice when she has no desire, rapist egos, egos that spill the energy outside the temple, egos that use contraceptives, egos that abort, egos that castrate themselves, egos that force others to be castrated, egos that castrate animals, egos that make grafts, egos of witchcraft, egos that criticize, egos that slander, etc., etc., etc.

- There is violence against God in the rogues of the intellect who deny man the spiritual possibility.
- The violent against themselves, the suicides. The violent against their own goods and the goods of others.

- We must work on all these defects in order to achieve purity in sex and arrive at the true practices of Supra-sex. In addition, we must observe our behavior toward our Mother Nature: the damage against ecology, the contamination of the waters, the air, the earth, the elementals, etc., etc.
- Eighth Infradimension - Sphere of Uranus: Uranus is related to the Holy Spirit, the Sexual Creative Energy, our Divine Mother. The Verb itself, the Truth.

In this sphere, on the contrary, we find all the liars, forgers, all those who falsify religions, counterfeiters of money, impersonators of people, the incestuous, the sowers of discord, the bad counselors, the black magicians who invite others to fornicate, those who promise and do not keep their word, the scandalous, the schismatics, the false, the hypocrites, etc., etc.

• Ninth Infradimension – Sphere of Neptune: We now find ourselves in the sexual apparatus itself. Here we find all the traitor egos of our psychology.

Each one of our desires, each one of our justifications and washing of hands, each one of our ill wills that prefer to do the will of the egos rather than that of the Consciousness.

For the esoteric work we must discover each one of our traitor egos, which manifest throughout the day.

This procedure is called Knowing oneself. From these Infradimensions will come the Light that illuminates our inner darkness or the Wisdom of Evil, and the Love that is trapped in those defects.

In these Infradimensions our Mercury is trapped. We must teach and encourage the students for the work of Psychological Death with the purpose of emancipating this bottled Essence.

On the comprehension of the psychological aggregates that have been seen will depend the balance of the centers and the rescue of our energies for creation.
