Conference 26 from Phase A.

CONF. 26

THE WORLD OF RELATIONSHIPS

The world of relationships has three very different aspects that we need to clarify precisely.

First: We are related to the planetary body, that is to say, to the physical body.

Second: We live on the planet Earth and, by logical sequence, we are related to the exterior world and to the matters that concern us, family members, business affairs, money, matters of trade, profession, politics, etc., etc., etc.

Third: The relationship of man with himself. For the majority of people this type of relationship has not the slightest importance.

Unfortunately people are only interested in the first two types of relationships, looking upon the third type with the most absolute indifference.

Food, health, money, business affairs, truly constitute the principal concerns of the “Intellectual Animal” mistakenly called ″man″.

Now then: It is evident that both the physical body and the affairs of the world are exterior to ourselves.

The Planetary Body (physical body) is sometimes ill, sometimes healthy, and so on successively.

We always believe that we have some knowledge of our physical body, but in reality not even the best scientists in the world know much about the body of flesh and bone.

There is no doubt that the physical body, given its tremendous and complicated organization, is certainly far beyond our comprehension.

With regard to the second type of relationships, we are always victims of circumstances; it is lamentable that we have not yet learned to originate circumstances consciously.

There are many people incapable of adapting to anything or anyone or of having true success in life.

On thinking about ourselves from the angle of the Gnostic Esoteric Work, it becomes urgent to find out in which of these three types of relationships we are at fault.

The concrete case may occur that we are mistakenly related to the physical body and, as a consequence of it, we are ill.

It may happen that we are badly related to the exterior world and, as a result, we have conflicts, economic and social problems, etc., etc., etc.

It may be that we are badly related to ourselves and that consequently we suffer greatly from lack of inner illumination.

Obviously, if the lamp of our bedroom is not connected to the electrical installation, our chamber will be in darkness.

Those who suffer from lack of inner illumination must connect their mind with the Higher Centers of their Being.

Unquestionably, we need to establish correct relationships not only with our Planetary Body (physical body) and with the exterior world, but also with each one of the parts of our own Being.

The pessimistic sick, tired of so many doctors and medicines, no longer wish to be cured; the optimistic patients fight to live.

In the Casino of Monte Carlo many millionaires who lost their fortune at gambling committed suicide. Millions of poor mothers work to support their children.

Countless are the depressed aspirants who, for lack of psychic powers and of intimate illumination, have renounced the Esoteric Work on themselves. Few are those who know how to take advantage of adversities.

In times of rigorous temptation, dejection and desolation, one must appeal to the intimate remembering of oneself.

In the depths of each one of us is the Aztec Tonantzin, the Stella Maris, the Egyptian Isis, God the Mother, awaiting us in order to heal our aching heart.

When one gives oneself the shock of “Self-Remembering”, a miraculous change truly takes place in the whole work of the body, so that the cells receive a different food.

- With spiritual birth we will improve the relationship with our body.
- With psychological death we will improve the relationship with our being.
- With the sacrifice for humanity we will improve the relationship with others and the exterior world.

End of Conference 26.
