Conference 33 from Phase A.

CONF. 33

LAW OF OCTAVES AND LAW OF ENTROPY

LAW OF OCTAVES.

Today we are going to study this Law and its opposite, that of Entropy, which govern all of nature. How to know them and be able to use them in order to achieve our objective of self-realizing in one existence.

The law of Octaves teaches us to ascend; it shows us where we stagnate, why, and how to be able to continue ascending to the final goal, how the laws of force work, etc.

The Law of Octaves, or the Current of Sound, or Current of Life, are the same.

If we observe the musical scale: DO - RE - MI - FA - SOL - LA - SI, we see the seven musical notes. To go from a lower DO to a higher DO it is necessary to rise one more octave.

We will call this scale the Current of Life, in which all human beings are directly involved, while at the same time subjected to it.

On beginning to sing a musical scale, DO - RE - MI, when we reach MI we find the First Pause, between the notes MI and FA. Then we see that the following three notes, FA - SOL - LA, go together, but on reaching LA we find the Second Pause, between LA and SI.

Passing to the note SI, we see that it stands alone, and we will find the Third Pause, between SI and the Higher DO. This implies that we are going to find three pauses in a musical scale. This same thing happens with all the events of one's life.

THE FIRST SHOCK is given at birth. On being born and inhaling the first breath, when the spark enters the new body, we have the right to the musical notes DO, RE and MI. These are equivalent to the Physical Body, the Vital Body and the beginning of Soul (given by the note MI), accompanied by a personality with which we manage in the physical world.

We are born, we grow, we reproduce, we grow old and we die without any true objective. All humanity will be in this as long as it does not find something that allows it to overcome this First Pause.

From the moment one reaches MI, one either continues ascending or returns to the point of departure. In the latter case, the Law of Entropy will make us equal in the cemetery, and we will have to return again and again until we exhaust the 108 physical bodies that we have by Law.

Here we find the so-called Men of the Third Day, seen in the light of Genesis, fascinated with existence, hypnotized and without even knowing the reason for their existence.

THE SECOND SHOCK: If someone gives us the Knowledge, our existence will have a reason for Being. “Of a thousand who seek me, one finds me”.

Once the Knowledge is received, two roads open up for us: we practice it and continue advancing, or we do not practice it and turn it into a belief

“Of a thousand who find me, one follows me”. Once the knowledge is received, we must begin to create in Sex, with the Sexual Creative Energy, the Solar Bodies in order to advance through the musical notes FA, SOL, LA. This implies the creation of the Solar Astral, Mental and Causal bodies, or doing the First Mountain and becoming Men of the Sixth Day, according to Genesis. Men made in the image and likeness of God, the True Men.

But even so one is not a God. It is necessary to overcome the Second Pause. The Third Shock must be given in order to conquer the musical note SI, and this will imply dying in oneself, or doing the Second Mountain. “Of a thousand who follow me, one is mine”

However, we still have to overcome the Third Pause. For this it is necessary to conquer the Higher DO, to achieve the Second Birth, the Resurrection, and one cannot resurrect without dying. This is the death of the Cause-Egos, which has to take place in order to be able to be born in the Spiritual World (Fourth Shock). This implies finishing the Second Mountain and beginning the Third Mountain.

When the person manages to advance from this Lower DO to this Higher DO, it is said that he has managed to BE BORN a second time.

That birth, at bottom, would be to become Resurrected. The alternative is open to all Human Beings, but it is absolutely necessary that one know how to do the work and how to apply the Three Factors of the Revolution of Consciousness:

To Be Born: First Mountain. Creation of the bodies, recovery of the Waters, Genesis.

To Die: Second Mountain. Elimination of the defects, Apocalypse.

Sacrifice for Humanity: Third Mountain. To obtain a Disciple.

LAW OF ENTROPY.

It is also called the “Law of Equalization”.

Example: If we put a pot full of hot water next to another full of cold water, we see how entropy is precipitated; there is an exchange of heat and cold. Finally, both end up equal.

Millions of people are caught on the road of entropy; since they do not work on themselves, each day they become more imbecilic; their mind goes on atrophying; the centers of the human machine are more and more degenerated; not all the organs of the brain work for them any longer; and finally a day comes when the Law of Entropy immolates them all in Tartarus.

Have you not noticed how the Law of Entropy immolates people? They can bury one in a coffin of gold and another in a coffin of wood, and however beautiful the sepulcher may be, in the long run they end up equally bony.

All things are marked under the Law of Entropy; it is found in everything. The seas turned into garbage dumps. Contaminated rivers, dying fish. An atmosphere contaminated by smog. The fruits of the earth adulterated. There is the Law of Entropy.

Only through transformation is it possible to overcome the Law of Entropy, for transformation includes sacrifices; that is evident.

For example: if one sacrifices sexual desire, that force which, by means of another force, crystallizes its powers in us, creates the Existential Bodies of the Being; if one sacrifices anger, the precious gem of meekness appears; if one sacrifices the craving for money, the unbearable greed, altruism will be born in one; if one sacrifices envy, philanthropic energy will manifest in one, the desire to work for one's neighbor, joy for the good of others; that is to say, there can be no transformation without sacrifice.

So also, for the man who sacrifices his sexual impulses, the result of that energy is the Creation of the Existential Bodies of the Being.

If the egos are sacrificed, if they are all destroyed, the result of that sacrifice will be the liberated energy, which will give origin to the Profound Interior Man. Then one escapes from degenerating entropy.

People do not truly want to sacrifice themselves; they do not understand what sacrifice is.

Clearly, one can begin by sacrificing one's sufferings; I assure you that people are willing to sacrifice their pleasures, even their vices and money; they would sacrifice everything, but not their sufferings and pains; they love them very much.

If one begins by sacrificing one's sufferings, one can take a great step: overcome the Law of Entropy.

Which of you is willing to sacrifice his sufferings, to sacrifice himself for humanity? It is good to sacrifice ourselves for humanity. In reality, we do not sacrifice ourselves in order to behave badly.

We must never think about suffering. People base their experiences on their sufferings, on what they went through in bitterness; they enjoy remembering them; they say: “I went through such and such things in the street in order to be what I am”. They feel important remembering them.

Sacrifice your sufferings; eradicate from yourselves the egos that produced them, and the sufferings are sacrificed, for the ego of sufferings must be eradicated. That energy that results from it is transformation, for a different man is born and overcomes the Law of Entropy.

End of Conference 33.
