Conference 43 from Phase A.

CONF. 43

VARIOUS TYPES OF LUSTFUL EGOS

We are going to look at this subject, which is important for the work of Alchemy; what we are going to see and what you are studying is decisive. Undoubtedly, Chastity is exactly the contrary of lust, the opposite, the totally opposite of the unfolding of lust.

We are going to speak about fire. Fire has two aspects: one aspect is given by the KUNDALINI, and the other aspect is the KUNDARTIGUADOR. These two are totally opposite.

The word Kundalini refers to the fire ascending victoriously through the spinal cord. Kundartiguador means fire descending to the atomic hells of the Humanoid.

We already know that the Sexual Creative Energy creates; its function is to create: with an ovum and a spermatozoon it reproduces the species.

The other spermatozoa that take part in the copulation also create: the psychological aggregates. When the seed was spilled, all the egos or psychological defects were created.

There exist three types of sexology:

- Supra-sex: Superior sex, regeneration, creation of the Sons of Light.
- Normal sex: Generation, Reproduction of the species without fornication.
- Infra-sex: Degeneration, Reproduction of the Ego with fornication.

Why do we have to study the egos of lust?

1. We need to achieve chastity so that there may be power and creation.
2. We need to rescue the trapped fire that exists in each one of the lustful egos, so that there may be birth.
3. We need the practice of sex to be ever purer.
4. The work on these egos is directed by the Divine Mother.
5. The work must be done through intimate Self-reflection:

How many times did I fornicate and in what way?

Let us see some lustful egos:

- Each understanding allows us to unfold into Observer and Observed.
- In Some egos we see the process of psychological death, and others are hurled into the Abyss.
- The work on the big egos makes part of the black mercury turn white.
- The work with the little details makes the sulfur appear, fecundating the mercury (Fire of the votive candles).

- When the defect is fully understood, the red mercury appears and the river of blood is seen.
- The single men who have no partner go on leaving the heap of bones, so that when the dog comes it may eat them.
- The lustful egos prevent Concentration, imagination and will.
- The process of regeneration begins with the disintegration of the defects that we know we have.
- We will achieve a greater sexual potency.
- In Alchemy this process is called “whitening the brass”.

End of Conference 43.
